

# **GALAXY LENS**

**SINGLE PIECE PMMA INTRAOCULAR LENS**

- Galaxy PMMA lenses are lathe cut from high quality pure PMMA material.
- Aspheric design imparts crystal clear vision at all light conditions and improves contrast sensitivity.
- Highly polished optical surface yields excellent optical clarity after implantation.
- Posterior 360 degree square edge minimizes the incidence of PCO.
- Positioning hole and Haptics with optimal flexibility and memory facilitate easy manipulation and positioning inside the capsular bag.
- Each implant is quality tested and packed.

## **Technical Specifications**

|                   |   |               |
|-------------------|---|---------------|
| Model             | : | ES701         |
| Material          | : | PMMA          |
| Optic Size        | : | 6.00 mm       |
| Overall Diameter  | : | 12.50 mm      |
| Optic Design      | : | Equi-Biconvex |
| Positioning Holes | : | 2             |
| Angulation        | : | 0°            |
| A constant        | : | 118.2         |
